

## Additional validity of the DeutschlandTicket on trains

The DeutschlandTicket is valid on nearly all *Nahverkehr* (short-distance) bus / tram / U-bahn / train (2ND class) services within Germany. The most-common *Nahverkehr* train types are S, RB, RE; some other *Nahverkehr* train types are RS, RT, IRE, MEX, FEX. Set search option to "Nur Nah-/Regionalverkehr" / "Regional transport only" in the Deutsche Bahn [DB] journey planner to check *Nahverkehr* status. The validity of other *Nahverkehr* tickets cannot be inferred from that of the DeutschlandTicket, and vice versa.

The DeutschlandTicket is also valid between these two stations on a DB *Fernverkehr* (long-distance) train service (IC or ICE) that connects these two stations.

Some IC / ICE services carry a *Nahverkehr* number (typically RE) in addition to their IC / ICE number. Unless they are the IC / ICE services listed above, they do not accept the DeutschlandTicket, despite having a *Nahverkehr* number. The DB journey planner states explicitly if the DeutschlandTicket is valid on a section of IC / ICE service.

valid on the entire service      valid till THIS station      (RB 3) (limited service)

The DeutschlandTicket is also valid outside Germany on this cross-border *Nahverkehr* train service (with the train operator stated).

For other railway border-crossing points, the DeutschlandTicket is valid only up to the last station in Germany before the border. For cross-border bus / tram services, check the validity of the DeutschlandTicket on them, even for journeys entirely within Germany.
