

Additional validity of the DeutschlandTicket on trains

The DeutschlandTicket is valid on nearly all Nahverkehr (short-distance) bus / tram / U-bahn / train (2ND class) services within Germany. The most-common Nahverkehr train types are S, RB, RE; some other Nahverkehr train types are RS, RT, IRE, MEX, FEX. Set search option to "Nur Nah-/Regionalverkehr" / "Regional transport only" in the Deutsche Bahn [DB] journey planner to check Nahverkehr status. The validity of other Nahverkehr tickets cannot be inferred from that of the DeutschlandTicket, and vice versa.

The DeutschlandTicket may also be valid between these two stations on a DB Fernverkehr (long-distance) train service (IC / ICE / RJ) that connects these two stations directly.

The DB journey planner states explicitly if the DeutschlandTicket is valid on a section of IC / ICE / RJ service. Some IC / ICE / RJ services carry a Nahverkehr number (typically RE) in addition to their IC / ICE / RJ number. However, not all of them accept the DeutschlandTicket, including some which run on the sections shown above.

The DeutschlandTicket is also valid outside Germany on this cross-border Nahverkehr train service (with the train operator stated).

⊗: For other railway border-crossing points, the DeutschlandTicket is valid only up to the last station in Germany before the border. For cross-border bus / tram services, check the validity of the DeutschlandTicket on them, even for journeys entirely within Germany.
