Hakka

(客家 Hakka as autonym $\subset$ what many linguists consider to be 客家)

Hakka & Shē

Coblin (2025: v)'s model

Paleo-Hakka 老客 = earlier emigrants, people not identifying as 客家, with partial Neo-Hakka traits (some of these classified are as “Hakka” in the LAC)

Hakka and Shē roughly in complementary distribution (Lo 2015)

Neo-Hakka 新客 ⊃ people with 客家 identity
Shē language 畬話: Sinitic language close to Hakka spoken by people of the 畬 ethnic group

Coblin, W. South. 2025. *Common Shē and Common Hakka-Shē: A comparative study* (Language and Linguistics Monograph Series 68). Taipei: Institute of Linguistics, Academia Sinica.

Lo, Seo-Gim 羅肇錦. 2015. 畬客關係的名實論證—客的前世是畬畬的今生是客. *Journal of Hakka Studies* 客家研究 8(2). 1–26.

Hakka & Shē

Neo-Hakka 新客 dialects, according to Coblin (2025):

1. MC sonorant initial tone B syllables are split into two groups
2. ‘to be’ 係
3. ‘I’ *ŋai
4. ‘to eat’ 食

Shē 畚：

Tone C1 merged into A1

Like Neo-Hakka, except ‘to be’ 是

Shē often a little bit influenced by neighbours,
e.g. in NE Fujian, “I” is often ŋwaj (cf. 福州 ŋwaj^B)

畚 Mand. shē^{A1}, Hakka ciā^{A2}, Canto. se4^{A2}
‘slash-and-burn farming’

Shē 畬

「畬族」 Shē ethnic group

「畬話」/山客話: Sinitic language spoken by a few hundred thousand people in the 畬族 ethnic category.

「畬語」(shee1238): divergent Hmongic language spoken by <1000 in Guangdong (增城、博羅、惠東、海豐)

(No strong evidence that these two groups are related)

(In Guizhou, another 40000 「東家人」 lumped into the 畬族 category; the speak a type of Western Hmongic)

Hakka

長汀 on 汀江：

「客家首府」

Hakka

Original Sinitic inhabitants of Hong Kong:
about half 圍頭 Waitau (莞寶粵)
about half 客家 Hakka (惠陽腔客家)
(plus other smaller Yue & Hakka & Min varieties)

HK Hakka lexicon & grammar

(Hakka and Yue share a lot of lexicon. Some differences:)

Some typical Hakka lexicon, e.g.:

圳 “field furrow” e.g. 深圳 cīm zùn

埔 “little plain” e.g. 大埔 tài pù

畚/輦 “slash & burn (field)” e.g. 禾輦 vō ciā

Many nouns with non-gendered semantics carry sex-specific suffixes

虱嫲 sīt mā ‘louse’, 舌嫲 sèt mā ‘tongue’, 薑嫲 gióng mā ‘fresh ginger’

蝠婆 pīt pō ‘bat’, 襖婆 āu pō ‘cotton-padded jacket’

蝦公 hā gúng ‘shrimp/prawn’, 貓公 miàu gúng ‘cat’

鼻公 pì gúng ‘nose’, 腳趾公 giōk zǐ gúng ‘big toe’

猴哥 hēu gó ‘monkey’, 罌哥 áng gó ‘bottle’

Cantonese has far fewer of these, e.g.:

蝨𧈧 sat1 naa2 ‘louse’, 蛤𧈧 gaap3 naa2 ‘frog’

腳趾公 goek3 zi2 gung1 ‘big toe’

鵲哥 liu4*1 go1 ‘hill myna’, 鼻哥 bei6 go1 ‘nose’

膝頭哥 sat1 tau4 go1 ‘knee’

HK Hakka lexicon & grammar

“What”:

Hakka: 乜介 mǎk gài (嘅 mǎi) (gài: 個 ; OC *kʰa[r]-s)

Canto.: 乜 mat1, 乜嘢 mat1 je5 (咩 me1, 咩嘢 me1 je5)
(嘢 je5: ‘thing’)

南寧平: 那門 na˧ mun˧

“To be”:

Hakka universally uses 係 (港客 hè)

Yue uses 係 (Canto. hai6), but transitions to using 是 is western Yue
(e.g. 玉林粵 ɕi˧, 南寧平 ɕi˧)

“To eat”:

Hakka universally uses 食 (港客 sit) (at least Neo-Hakka and Shē)

Yue: Cantonese uses 食 (sik6), but this is a recent Hakka influence.

Amongst Yue dialects 吃/喫 is more common, e.g. 港圍頭 吃 həkʰD1,
中山石岐 喫 jak˧D2, 南寧平 吃 het˧D1

(Canto. also has 喫 jaak3, but now considered very informal in HK.)

HK Hakka lexicon & grammar

Table 2:

Five types of colexification of EAT DRINK and SMOKE.

Type	Lexification patterns	Number of data sites
I Dislexification	EAT ≠ DRINK ≠ SMOKE	29 (18.2%)
II Full ternary colexification	EAT = DRINK = SMOKE	62 (39.0%)
III Binary colexification	EAT = SMOKE ≠ DRINK	52 (32.7%)
IV Binary colexification	EAT = DRINK ≠ SMOKE	7 (4.4%)
V Binary colexification	DRINK = SMOKE ≠ EAT	9 (5.7%)

Type I e.g. Stan. Mand. 吃飯 chī fàn ≠ 喝茶 hē chá ≠ 抽煙 chōu yān
mainly north of Yangtze

Type II e.g. HK Hakka 食飯 sìt fàn = 食茶 sìt cā = 食煙 sìt yén (also bòk yén)
mainly south of Yangtze

Type III e.g. Canto. 食飯 sik6 faan6 = 食煙 sik6 jin1 ≠ 飲茶 jam2 caa4
e.g. Yuè, Hui, Jìn

Type IV eat = drink ≠ smoke

(Their examples: 儋州客 食 sìt = sìt ≠ bòk; 南寧江南平 吃 het1 = het1 ≠ 燒 [jiu])

Type V e.g. 全州湘 吃 tɕɿ1 ≠ 喝酒 xwo1 tɕjəw1 = 喝煙 xwo1 iẽŋ1 < HM trait

Figure 3:

Diachronic evolution of EAT and DRINK from Old Chinese to Modern Chinese (adapted from [Li and Tang 2020](#), p. 21).

(Wu 2000) Cantonese primarily used 喫 during Qīng dynasty (喫 jaak3 = 吃 hek3). 喫 is still more common than 食 amongst Yuè dialects; 食 is usually used amongst Yuè dialects which are (geographically) closer to Hakka and Mǐn dialects.

(e.g. Lau 2002, Lin 2021)

遷界令／遷海令 The Great Clearance
(清 edicts 1661, 62, 64, 79)

The entire coast (30-50 里 of land) from Shandong southward were cleared of civilians and civilian structures, to stop them supplying the 鄭 Dynasty (1628 – 1683; 明 loyalist) based in Tainan.

Lau, Chun-Fat 劉鎮發. 2002. 粵北土話跟客語和粵語的關係及其歸屬問題 [Northern Guangdong Tuhua' s relationship with Hakka and Yue and the question on its affiliation]. *New Asia Yearly* 新亞論叢 4. 242-249.

Hakka 客家 & Sleiyip 四邑

展界令/復界令 End of the ban 1683

Not everyone returned; large number of people from 嘉應州 moved to e.g. 潮州府、惠州府、廣州府、肇慶府 (嘉應州 was separate from 潮州府 in 1733)

Hakka 客家 & Sleiyip 四邑

First opium war 第一次鴉片戰爭 1839–1842 (caused poverty)

Red Turban Rebellion 廣東洪兵起義 1854–1856

(清 utilised existing conflicts between 「客」 (i.e. 嘉應州 migrants) and 「土」 (本地 Punti i.e. locals), employed 客 to crush the Punti Red Turbans)

Punti–Hakka Clan Wars 土客械鬥

especially in 四邑 Sìyì / Szeyup (sei3 jap1) / ʰej1 jip1 “four counties” area (1855–1868)

In the end: 清 government expelled most 客家 people out of 四邑; some moved back to 嘉應州, some moved to Guangxi or E Guangdong, some went overseas.

The exonym 「客家」 was reclaimed by Hakka people in the Pearl River Delta Region, and gradually spread to e.g. NE Guangdong / W Fujian / S Jiangxi.
